1 How to add a Link	1
----------------------------	----------

1 How to add a Link

Example is as follows

```
<a name="Great is the lord.mp3" id="Great is the Lord" class="link" onClick="catchy(th
```

or

```
<a name="http://blm.org.in/Media/AudioBible/OT/01001-The_Book_Of_Genesis_Chapter-001.m  
class="link" onmousedown="catchy(this.name,this.id)">1</a>
```

1. Replace the original code i.e only **a** div tag code with the above code
2. **Name** is where we specify the url of the Song.
3. **id** is where we specify the name of the particular song which we want to see on the player.
4. And the last one is changing the innerHTML i.e the verses link in html..
5. These are the only changes that need to be made.....
